Graduation Project (GO FAST)

- The Shared Scooter System is revolutionizing micro mobility and empowering a new urban lifestyle
 - The mobile app lets riders easily find and unlock shared smart scooters
 - providing them with a fun, efficient and sustainable way to move around the city
- Grade : A+ "Excellent"

PROJECTS

- AIRBNB Web Application

- peer-to-peer marketplace and the user can rent from another user
- It is a site for booking and renting a place and homes We were able to add some features, which is to create direct chat communication and add payment methods Adding the advantages of searching for the best place
- The development of this software was made possible through the use of powerful tools such as ASP .NET Web API, Entity Framework Core, and Angular. These technologies were chosen for their ability to deliver high-quality and scalable solutions. We also utilized Entity Framework Core to create a SQL Server database using the Code-First methodology.

- E-COMMERCE Web Application

- The development of this software was made possible through the use of powerful tools such as ASP .NET Web API, Entity Framework Core, and Angular. These technologies were chosen for their ability to deliver high-quality and scalable solutions.

-Hospital System

A hospital system that manages all database operations of a hospital (doctors, patients, departments, nurses and managers) and traces the issues for all patients.

Technologies: .Net MVC Core

CERTIFICATIONS

Pluralsight - Angular Framework (2023)

COURSE WORK

- solid principles
- Date base
- Agile
- Date Structure
- distributed systems
- Algorithms
- object oriented programming
- Design pattern
- operating System
- Date Mining
